	Comments	Variables	Test Name	Test Data	Test Setup	Length	Lack of Documentation	Assertion/Test Name - Match
The method and variable are easier to understand.		+	+					
It's difficult to understand the intent of the test looking only at the name since it tests equals but it also tests the behavior of the tookring method.			-					
The control of the following of the control of the	+/-	-	-	-				
Test name makers no sense, as test scenario makers no sense, 2. Test object is initialized in rather unobvious way. 3. Test contains unrelated assertions.								-
George selects for jimogeneline, ying specificanistics jimogeneline share and selection of the selection of		-	-	-	-	-		
tect name tectus long, "Measuring proclaim", ingric be instrumed (gastic, Continued): C suggict be instrumed (gastic, Continued): C sally considerable processing to the sally considerable above, you storonly assembles as a single that where the technique is the sall processing for examples of the best Case is cyano complex (morange multiple paints).	+/-		-				_	
Variable names, seeling with a new chandom's commentary. The same and instantion do not mainly along whealing the singup motion examinates. But the control of the singup motion examinates in seasons. A district with a price of the singuing seement. A district will happe only the price of the singuing park how, researced, the analysis of participation to the season of the singuing the longing is not examend until a should at emphasises the emphasism on special state of them the substitute emphasism of special state of them the substitute.	+/-	-	-				-	
The the medical cases, it is description and if they noted here are being long to make the larges. The sealing assessment to the larges the sealing assessment and description, but were the sealing assessment and description, but were the sealing assessment, it is threat the latenance trapper assessment and assessment and the same assessment as the sealing as the sealing assessment as the sealing as the sealin	+/-	+/-	+	_				
For variables, budgett it do but I would have been outset to whereigh of it will would have been outset to whereight of it will would have adopted you also "had personal" for set don, It it do believe on our substituted with the set of the set of the set of the set of the set of the set of the set of would like a sequir committee and is official to understand.				-				
The name of the text case is difficult to understand, if don't know what "callificacie" mann. The visuable names are very understandable, also the text data. There are no commence is nick feet case, so I marked it as 0.	-	+/-	-					
All parts are easy to understand	+	+	+	+				
Commences the comments prepared, for all one from the text of our all one from the text of our all one for the text of	-	+/-	-	-				
There is no commons, for faith There are a before the state that we complete concluding the state of the stat	-	-	+	-				
inde on the of the "Different and "Office and "Different and "Different and a second and a secon		-						
I don't understand the intention of the method, why it is calling equal with 4 arguments and oracing the weapon with 6. The initialization of variables is understandable.		+	-					
The text name is not correct, there are no commerce and the validalinames are not descriptive at all. This makes it way hard to understand the next the data also seems to be attitudely picked and to understand the numbers are without picked and to understand the procession surbetter are within they should be.	-	-	-	-				
The names are so long that they run off of the page, which is really confusing. The test data is made up of all lists, so in a difficult to know what each represents without some serious help from the editor.		-	-	-				
It is eary to understand the purpose of the sect front the function name. However it is instarter to understand the sect without any comments, unless you know the cold betterhand. The variable crames are quite easy to understand, but I would not add numbers in their names.	-	+/-	+					
There are no code comments, so 0 The intention of this (compare) was still easier to grasp than the previous one, though	+/-							
What is happening is, soften easy to understand due to the situate copie of what is seemed, but the manning of variables make it handles to mad. Also the string indicated the assensitionals make it more difficult to partie.	+/-	-						
for the control of the species, it would wisle to him a control of the species of the control of	-			-			-	
The describinal life of allfold tend some print, but it is seen using billionist and ordering mind as all another in design for low or order and notified by the seeding for low or order and notified by the mind of the seeding of the seeding of the seeding by the mind of the seeding of the seeding of the seeding of the seeding of the mention, which makes the view or agent commonstry's throated its way optimizing the lower in the services being throated in way optimizing the lower in the services being the seeding of the seeding of the seed of the services being throated in way optimizing the lower in the services being throated.		-	-	-				
"returning positive" is the method name does not align with the assertion. Variables declaration, despite the bad naming, is quite fine for ms. The assertions are quite bad for ms. It carried understand it.		-	-					-
This came is too exception text Crease disappendiamed contributing for guments And Calling and As well as your another cames: [Winappendiame, Winappendiamed see: Var names of onest though the objects' difference, though they are quite big.		-						
Test name does not cover fully the test intention. There no comments. Test data is simple, but I can't understand what is 203	+/-			-				
The main difficulty is understanding where the number 203 comes from, and why not simply check into > 0.
